Model: NT3BH-LE High-Efficiency Triple Door Bottle Cooler Energy Class C
1.35 kWh/24h | 270 Bottle Capacity | 30°C Ambient Rated*

GENERAL INFORMATION

The Prodis NT3BH-LE is the ultimate high-volume merchandising solution for busy bars, restaurants, and venues requiring maximum stock holding. With an impressive width of 1335mm and a triple-door configuration, this unit acts as a stunning visual centerpiece, driving product sales through its expansive, shadow-free LED-lit display.

Despite its massive 270-bottle capacity*, the NT3BH-LE retains the 'Low Energy' DNA of the series. It features a precision-engineered cooling system warrantied for operation in ambient temperatures up to 30°C, ensuring your entire stock holding remains ice-cold even during peak service. Whisper-quiet (43dB) and finished in a sleek, hard-wearing black coating, it combines heavy-duty performance with premium aesthetics.

ENERGY RATING INFORMATION

KEY FEATURES

- Massive Storage Capacity:** Purpose-built for high-volume venues, holding 270 x 275ml bottles (or approx. 244 x 330ml standard lager bottles) to minimize restocking during service.
- Market-Leading Efficiency:** Official Energy Class C rating with a daily consumption of just 1.35 kWh/24h, reducing running costs to as little as ~41p per day.
- Heavy-Duty Cooling:** Tested at Climate Class 3 (25°C) for maximum efficiency, but engineered and warrantied for operation in high-ambient environments up to 30°C.
- Whisper-Quiet Operation:** Running at just 43dB, this unit is perfect for quiet hotel lobbies, meeting spaces, and office boardrooms.
- Premium Merchandising:** Full-width, pure white LED illumination creates a bright, shadow-free display to drive product sales.

TECHNICAL & OPERATIONAL FEATURES

- Precision Control:** Externally mounted digital temperature controller (range +2°C to +10°C) with automatic off-cycle defrost.
- Optimised Airflow:** Front-breathing ventilation system allows for tight installation with minimal clearance required (25mm rear / 10mm sides).
- Temperature Class K4:** Certified to maintain an average product temperature of +5°C, ideal for premium lagers, craft ales, and white wines.
- Security Standard:** Doors feature factory-fitted locks as standard for stock security.
- Construction:** Hard-wearing black exterior with a hygienic, easy-clean aluminium interior.

INSTALLATION & MAINTENANCE

- Space-Saving Design:** Slimline 520mm depth ensures a perfect fit behind standard bar counters without protruding into the workspace.
- Replaceable Gaskets:** Door seals are easy to remove and replace, ensuring a tight seal and maintained efficiency over the unit's life.
- Self-Closing Mechanism:** Doors are engineered to close automatically to prevent accidental energy loss, featuring a positive seal system to maintain the Class C efficiency rating.
- Eco-Friendly:** Charged with R600a refrigerant (GWP 3), fully compliant with modern environmental standards.
- Plug & Play:** Supplied with a 1.85m lead and moulded UK 13A plug for immediate installation.

DIMENSION & WEIGHT

External dimensions (W x D x H mm)	1335 x 520 x 900
Internal dimensions (W x D x H mm)	1120 x 355 x 745
Depth door open (mm)	905
Width doors open (mm)	2145
Shelf dimension W x D (mm)	385 x 318 (left & right) 436 x 318 (middle)
Packaged dimensions W x D x H (mm)	1390 x 560 x 1035
Net weight (kg)	75
Gross weight (kg)	80.5

SHELF SPECIFICATION

Shelf size (W x D mm)	385 x 318 (left & right) 436 x 318 (middle)
Shelf capacity (kg)	20
Number of shelves	6
Base size (W x D mm)	1120 x 205

BOTTLE CAPACITY

330ml (ø 61mm) standard bottle	Left & Right	Middle
	30 (6 x 5 lane packing)	35 (7 x 5 lane packing)
Shelf capacity	32 (hexagonal packing)	36 (hexagonal packing)
	54 (18 x 3 lane packing)	244 (real world usage figures)
Base capacity	254 (maximum theoretical loading)	
330ml (ø 58mm) sleek bottle	Left & Right	Middle
	30 (6 x 5 lane packing)	35 (7 x 5 lane packing)
Shelf capacity	36 (hexagonal packing)	42 (hexagonal packing)
	57 (19 x 3 lane packing)	247 (real world usage figures)
Base capacity	66 (hexagonal packing)	294 (maximum theoretical loading)
275ml (ø 55mm) stubby bottle	Left & Right	Middle
	35 (7 x 5 lane packing)	35 (7 x 5 lane packing)
Shelf capacity	39 (hexagonal packing)	42 (hexagonal packing)
	60 (20 x 3 lane packing)	
Base capacity	95 (hexagonal packing)	
	270 (real world usage figures)	
Total bottle capacity	335 (maximum theoretical loading)	

TECHNICAL SPECIFICATION

Ventilation Requirements (mm)	Rear	25
	Top	20
	Sides	10
Refrigerant	R600a	80g
Power input (W)	205	
Rated current (A)	1.35	
Noise level (dB)	43	
Cable length (mm)	1850	
Climate class (energy test) ¹	3 - 25°C / 60% RH	
Climate class (maximum ambient) ²	4 - 30°C / 55% RH	

ENERGY USAGE

Energy rating	C
Energy consumption (kWh/24h)	1.35
Energy consumption (kWh/annum)	491
EEL	34.5
Cabinet family	BCVTn
Test standard class	K4

CABINET CONSTRUCTION

Exterior	Black powder coated
Interior	Aluminium
Doors	3 x hinged plastic frame
Self closing	✓
Self closing mechanism	Sprung
Lockable	✓
Glazing	Double glazed & toughened
Interior lighting	✓
Lighting type	LED
Lighting colour temperature	6000k
Light power (W)	8
Light switch	Interior mounted
Controller	Digital
Controller position	External base
Controller display colour	White
Controller cover	✓

LANE PACKING EXAMPLE

HEXAGONAL PACKING EXAMPLE

STANDARD LANE PACKING (GRID LAYOUT)

The Standard Lane Packing method prioritizes accessibility and cooling efficiency over maximum density. In this configuration, bottles are aligned in straight columns and rows, creating a reliable grid where the theoretical capacity is easily achieved in the real world. Crucially, the void spaces naturally formed between the non-nested bottles significantly increase airflow throughout the cabinet. This enhanced circulation ensures rapid temperature drawdown and uniform cooling, which maximizes the energy efficiency of the refrigeration system. This layout is the ideal choice for operations where quick restocking, lower energy consumption, and product visibility are the primary requirements.

HEXAGONAL PACKING (HONEYCOMB LAYOUT)

The Hexagonal Packing method utilizes geometric efficiency to maximize storage density by nesting each new row of bottles into the triangular gaps of the previous one. This "staggered" arrangement delivers a substantial increase in stock holding capacity compared to a standard grid. However, there is often a distinction between the mathematical maximum and the "Efficient Real-World" capacity, as the tightest theoretical fit can make loading difficult. Furthermore, this increased density reduces the gaps between bottles, restricting airflow through the shelf. While this method allows for maximum volume, the limited air circulation means the refrigeration unit may work harder to cool the product, resulting in increased energy usage.

¹Testing Standard: Official Energy Efficiency Class 'C' and daily consumption figures (1.35 kWh/24h) are verified under EN16902 standards at Climate Class 3 (25°C / 60% RH).

² Operational Limit: This unit is engineered with a heavy-duty cooling system warrantied for continuous operation in ambient temperatures up to 30°C (Climate Class 4). Note that energy consumption will naturally exceed published test figures when operating in ambients above 25°C.
