

Installation

Position on a level surface capable of taking the weight of the Airack plus a basket full of glasses ($\geq 20\text{Kg}$). Fit onto a flat surface with the Airack resting on it's feet.

Clearance is required above the Airack to allow a basket of glasses to be placed on top of the unit.

The air intake in the centrally recessed base of the unit must not be covered or restricted.

Connect the Airack to the electrical supply using the plugtop (fused @ 3 Amps) into a switched UK 3-pin switched socket (within 1.5m of the Airack).

NOTES:
DIMENSIONS ARE NOMINAL
